

Poor Human Beings are Resilient!

Author: Max Haroon max@openstreamdesign.com

I have always believed in theory that human beings are nice but naïve and there have always been some people who exploit them for variety of reasons. These people or groups consider themselves as elite but I would call them “scum” in my writing.

History has demonstrated that these scums (not necessary the same groups of people or successors of a previous such groups) have used many tactics to keep masses in what I call in a “grey zone”. These scums may be a group of international financiers, religion caretakers, aristocrats, royalty or whatever (or they may have scum groups among themselves). Let us look at some of the tactics used by them:

1. **Religions:** These caretakers will have crusades, inquisitions, treasons, blaspheming, excommunications or even war to keep masses in control. First a religion will be created. Once it becomes too much to handle then denominations will be created. If more instability is required then sectarian cultures are created. You can see the evidence of this not only in Middle East but also in many other parts of the world. Ironically masses, who are now believers, will kill their own in the name of the same “God”. No doubt the believers will never have peace and power but that is the whole idea. After all these caretakers (or in combination with other scum groups) want to have the absolute power.
2. **Governments:** It does not matter who is governing, you will find there are kingmakers, who will keep the power to themselves. They manipulate the governments so that the population is manipulated. If need be the “governors” are killed if they are out of line with these kingmakers.
3. **Fear:** We have seen “terrorism” created to manipulate voters to elect representatives (e.g. neo cons) of these scum group. When the fear fades away, extreme events are staged to re-kindle the fear.
4. **War:** They are not strictly fought (or even created) by the governments. The war industry has to be kept going and this industry has no patriotism to any country. Again the war industry owned by this scum group will feed both sides of the war. A government in the war has to borrow monumental amount of money and guess who lends the money to the government? Everything is fair in war!
5. **Poverty & Misery:** This scum group has more wealth than one can imagine but they are always designing innovative methods (racketeering, protection money, etc.) to suck more money from masses. It is pathetic to see one of the richest oil reserve country has been divested so much so that one third of its population live in misery, they do not have adequate food, water and shelter.
6. **Farming:** Farmers are convinced to buy genetically modified seeds, so that the crop will not fail by lack of water and pesticide. But farmers find out soon that they have been exploited as these terminator seeds can not be replanted, so the farmers have to keep on buying seeds from monsantos of the world. So these monsantos of the world will control the farmers and their countries allover the world.

7. **Food:** We eat anti-biotic & hormone laced injected animals, which are fed on genetically modified grains and grass. We eat heavily pesticide-treated vegetables and fruits, which do not have sufficient nutrition to keep us healthy. And when we become sick, we have to buy drugs from the large pharmaceutical companies of the world, which sometimes make you sicker.
8. **Thinking:** Poor education and lack of interest in reading or current affairs is deliberately planned, so that you do not have to think twice about what has been asked from you. You will believe everything the media (which is controlled by the scum groups) is telling you! You have been awarded with highly absorbing entertainment, theme parks, TV and radio of thousands of channels. All of that should really keep you busy for your life time.
9. **Brain Washing:** Masses are brain washed to buy and use perfumes, deodorants, hair dyes, smoking, and alcohol although the ingredients may be banned or harmful to the human body. Advertising budgets of these products often far exceed the entire budget of a small country.
10. **Colonial Power:** For centuries conquering of countries to control and exploit their resources required military power. Now you can control the economies of targeted countries without conquering them. A petroleum company has more power than a government.

So you are covered, no matter what masses do for living, what religion they believe or what colour or class they belong to.

If that is not enough, natural events like Tsunami, earthquakes, tornados, heating of the planet and floods take their own toll on human deaths and miseries.

What amazes me that in spite of these adversaries, exploitation and wars, human beings (and the earth) are still surviving!

That is the resiliency of human beings.

My theory is validated by this documentary movie; it will be an eye opener, as my friend David Johns said "Can you handle it?"

<http://www.zeitgeistmovie.com/>

The documentary addresses multiple ideas, some of them will sound very radical but worth viewing. It may even inspire you as it has inspired me to write this piece.

I wish to establish study groups to explore mind, body and soul and empowering life. If you are interested then visit the website:
